Guidelines for Academic Audit 2022 - 23

Objective:
The purpose of an academic audit is to encourage the institution to regularly and continuously evaluate the quality of education and to enable the faculty to improve the quality of teaching and learning on an ongoing basis.

Outcome:

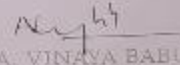

- To ensure timely, efficient and progressive performance of academic processes.
- To Develop and set up quality benchmarks/parameters for various academic activities of the institution.
- To ensure that the institute is benefitted by Outcome Based Education approach.
- To facilitate the creation of a learner-centric environment through co-curricular and extracurricular activities as well.

Guidelines for HoDs

- Place all documents for verification at a suitable place.
- During departmental visits, each head of department will make Powerpoint presentation of 5 minutes showing only highlights/achievements, followed by interaction with other members of department.

Guidelines for the Internal Committee Members

- On the basis of their observations, the Internal Audit Team will prepare a report and submit it to the Coordinator, IQAC.

ii. Answer to each question must be written at one place only and in the same order as they occur in the Question paper.
iii. Missing data, if any, may be suitably assumed.

Part-A

6X2=12M

1. (a) Differentiate between spontaneous and stimulated emissions. 2M CO1 BTL2
- (b) Summarize the properties of ferromagnetic materials. 2M CO2 BTL2
- (c) The critical temperature of lead (Pb) with isotopic mass 206 is 7.2K. Find the isotopic mass of lead if the critical temperature falls to 7.12K. 2M CO3 BTL3
- (d) Define thermistor and give two applications of it. 2M CO4 BTL1
- (e) Outline any four advantages of nanomaterials. 2M CO5 BTL2
- (f) Evaluate critical angle and acceptance angle of an optical fiber whose core refractive index is 1.485 and cladding refractive index is 1.48 2M CO1 BTL4

Part-B

4X12=48M

2. (a) Illustrate the working and construction of a He-Ne laser by illustrating its functional and energy level diagrams. 8M CO1 BTL3
- (b) Explain various types of optical fibers based on modes of propagation. 4M CO1 BTL3
3. (a) Explain capacitance bridge method to determine dielectric constant of a given material. 8M CO2 BTL4
- (b) Distinguish between soft and hard magnetic materials along with any two examples for each type. 4M CO2 BTL4
4. (a) Summarize experimentally observed properties of superconductors by giving necessary theory. 8M CO3 BTL2
- (b) Find the de Broglie wavelength associated with (a) a pin-pong ball of mass 2g moving with a velocity 100m/s (b) for a thermal electron having energy of 1ev. 4M CO3 BTL2
5. (a) Compute total carrier concentration (n_i) of an intrinsic semiconductor. 8M CO4 BTL3
- (b) Write the assumptions of classical free electron theory and state its limitations. 4M CO4 BTL3
6. (a) How properties of materials undergo changes at reduced dimensions? Explain in detail the preparation of nano materials by chemical vapour deposition (CVD) technique. 8M CO5 BTL3
- (b) State Photovoltaic effect? Discuss construction of a solar cell. 4M CO5 BTL3
7. (a) Define dielectric polarization? Evaluate expression for electronic polarizability of an atom. 6M CO2 BTL5
- (b) Define Hall effect. Derive an expression for Hall Coefficient. 6M CO4 BTL6

Attendance Rules

III. RULES AND REGULATIONS OF ATTENDANCE

1. Candidates admitted to a particular program of study are required to pursue a “Regular program of study” before they are permitted to appear for the Semester End Examination.
2. “A regular program of study” means putting in attendance of not less than 75% in each semester.
3. a) In special cases and for sufficient cause shown, the Chairman Academic Council may, on the specific recommendations of the Principal / Head of the Department, condone the deficiency in attendance to the extent of 10% on medical grounds subject to submission of medical certificate and payment of condonation fee.
b) However, in respect of candidates who seek condonation of attendance due to pregnancy, the chairman Academic Council may condon the deficiency in attendance to the extent of 15% (as against 10% condonation for others) medical grounds subject to submission of medical certificate to this effect. Such condonation shall not be availed twice during the program of study.
4. The fee for condonation of attendance on medical grounds shall be Rs. 2000/- (Rupees Two Thousand only) payable through Demand Draft drawn in favour of the Principal, Stanley College of ENGG.. & TECH for Women.”
5. “Attendance of N.C.C / N.S.S Camps or Inter collegiate or Inter University or Inter State or International matches or debates or Educational Excursions or such other Inter University activities as approved by the authorities involving journeys outside the city in which the college is situated will not be counted as absence. (i) Such ‘absence shall not exceed four (4) weeks per semester of the total period of instructions. (ii) Such leave should be availed with prior permission from the Principal and not be availed more than twice during the program of study. (iii) Without any prior permission, such leave shall be treated as absence. (iv) While calculating the attendance, the no. of classes not attended in each subject should be deleted in the denominator.

-
6. The attendance shall be calculated on the aggregate of the papers / Courses from the date of commencement of classes / date of readmission in case of detained candidates as per the almanac communicated by STLW.
 7. In case of the candidates who fail to put in the required attendance in a program of study, she shall be detained in the same class and will not be permitted to appear for the Semester End Examination. Such candidates shall have to seek readmission into the same class during the subsequent year in order to appear for the examination after fulfilling the attendance requirements and on payment of requisite tuition fee.
 8. a) Candidates admitted to the first year through an entrance test and do not have the requisite attendance but have not less than 40% attendance can seek readmission without once again appearing for the entrance test.
b) In respect of candidates of such programs where the admissions are governed through an entrance test, candidates of First semester who do not have the minimum 40% attendance would lose their seat and they will have to seek admission afresh by appearing at the entrance test once again.

CIE Assessment

Continuous Internal Evaluation (CIE - 40 M):

- Continuous Internal Evaluation (CIE) shall consist of sessional examination (Internal Exam- 25 M), Quiz (Q-5M), Assignment (A-5M) Class Assessment (CA- 5 M).

Internal Examination (25 M):

- For theory Courses, three sessional examinations shall be conducted in each semester as per the academic calendar. Each sessional examination shall be evaluated for 25 marks.
- Question paper pattern for sessional examination (25 Marks) shall be as follows:

PART-A: 5 X 2 M = 10 M

All questions are compulsory.

PART-B: 3 X 5 M = 15 M

- a. In Part-B three out of four questions have to be answered.
Average of best two SEs shall be calculated and used as the final sessional marks for each course.

Class Assessment (CA -5M):

The CA marks of each subject will be acquired by performing any one of the following activity during the semester.

Activity	Max.Marks(5M)
Technical Participations in inter College Competitions / Paper Presentations / Publications	5 Per Activity
Certification Courses (SWAYAM,NPTEL or Relevant online Recommended Course etc)	5 Per Activity
Course Project/Project Based Learning (PBL)	5 Per Activity

Smart Solar PV Monitoring using Cloud Computing

Dr.Aihloor Subramanyam Sreelatha

Associate Professor, Department of Electrical Engineering, Stanley College of Engineering and Technology

Abstract

Renewable energy sources are proven to be reliable and accepted as the best alternative for fulfilling our increasing energy needs. As technology is advancing, cost of renewable energy equipments is decreasing which has resulted in a massive increase in solar photovoltaic installations. Most of these installations act as auxiliary power source. A majority of these are installed in inaccessible locations – as close as a rooftop to as far away as a desert. Hence, they require sophisticated systems for remote monitoring of these installations using wide area networks. The system described in this paper is capable of measuring the values of Solar PV voltage and current and temperature and sending them over on mobile networks to the internet for data logging and review by the user. In case of a deviation from normal specified values of current, voltage or temperature, the system is also capable of alerting the user via an IOT. The idea is to connect all sensors and devices on a common network i.e. internet through wired or wireless means so that the user can access the data and control the devices from anywhere around the globe with an internet connection. Along with this, the aim is to automate the process using pre-defined logic to reduce human intervention as much as possible. It has gained a lot of attention in recent years due to its diversified usage in the fields of consumer electronics, home automation, health care, smart car, smart city and security purposes. The Solar PV voltage is sensed by voltage divider circuit. Current is sensed using Hall Effect Current Sensor ACS712. The temperature and humidity is sensed using DHT11 temperature and humidity sensor. A dedicated computer system is set up to store the data obtained for future reference and review. This data now can be viewed anywhere on the globe using an internet connection on an IP by an IoT module. As the conventional sources of electricity generation are depleting, mankind is in need of renewable sources such as solar and wind energy to sustain itself. Hence all we need is a good, up-to-date monitoring system which can perform major tasks automatically without human intervention and can provide data to the user whenever and wherever needed. IOT is the best solution for monitoring of solar installations. IOT based remote monitoring of the Solar PV installation will also save energy and man-labour.

Design of a decentralized wide-area control system to tolerate the loss of communication paths based on coherency analysis

Nagasekhara Reddy Naguru

Department of Electrical and Electronics Engineering, Stanley College of Engineering and Technology for Women, Hyderabad, India

ARTICLE INFO

Keywords:
Coherency
Decentralized WAC system
Inter-area oscillations
Loss of data
Wide-area controller

ABSTRACT

The objective of this article is to design a wide-area control (WAC) system based on coherent groups of generators to overcome the loss of data and communication failures. In the conventional approach, the wide-area controller is designed by employing the state feedback control. It requires all the states on the controller input side and sending signals to all generators' excitation systems on the output side. Therefore, good communication paths are necessary to get quality data every time. In addition, there should not be any data loss or false data due to phasor measurement units (PMUs) installed at every generator. However, it is not possible to get quality data without losing anything. Hence, it leads to the unstable condition of the entire power system. To address this problem, the area-wise coherency-based WAC system is proposed in this article to overcome the above-mentioned problems. The entire power system is divided into different areas based on coherency. Therefore, the centralized WAC system is divided into decentralized WAC systems based upon coherent groups of generators. This can be achieved by employing structurally constrained H_2 -norm optimization. Moreover, to validate the strength of the proposed controller, it is compared with different existing controllers reported in the literature by considering different case studies on IEEE-39 and IEEE-68 bus systems.

It is to bring to your notice that Ministry of Education & AICTE, Govt. of India together organizing "Smart India Hackathon – 2022" under MIC – MoE's Innovation Cell.

All the HoDs, IIC Coordinators & Staff are requested to encourage students to participate this national level contest and benefit.

Guidelines for Students:

1. Select a Problem Statement from www.sih.gov.in
2. Form a Team with Exactly Six members.
3. Team Members can be drawn from different branches & years from Stanley Only.
4. One of the members will act as Team Leader (Corresponding Member).
5. All the ideas will be screened by conducting an Internal Hackathon in Feb/March'2022.
6. Selected Ideas/teams will be sent for contest.
7. Every team will be assigned a faculty Mentor & Industry mentor.
8. Selected Teams will get technology training from AICTE/MIC.
9. All the participants will get certificate from IIC.
10. Teams will be supported by College & Winner teams will get Reward of worth Rs.1,00,000/-

Note: Approach department IIC coordinator or Dr A Sreelatha, Assoc. Prof of EEE, Innovation Coordinator for more details about **Internal Hackathon**. Visit www.sih.gov.in and contact IIC Convenor, SPOC Dr K Ramakrishna for external information.
